

Aidan Syrgak

Boston, MA | aidan.syrgak.02@gmail.com | linkedin.com/in/aidan-syrgak

EDUCATION

Northeastern University, M.S. in Electrical and Computer Engineering | Boston, MA

Expected: May 2027

Worcester Polytechnic Institute, B.S. in Data Science | Worcester, MA

Dec 2024

TECHNICAL SKILLS

Languages: Java, Python, C, C++, JavaScript, R, SQL, HTML, CSS

Libraries: Pandas, NumPy, Matplotlib, TensorFlow, PyTorch, Scikit-learn

Frameworks and Tools: Apache Hadoop, Spark, Pig, Hibernate, PostgreSQL, Power BI, Tableau, Django, Astro

EXPERIENCE

Permitting and Data Science Intern

Jun - Aug 2024

Orsted North America | Boston, MA

- Engineered datasets of usable permit data by consolidating and cleaning information from the company's various renewable energy projects.
- Developed a Power BI dashboard tool, enhancing data visualization and automation for the Permitting Team.

Office Assistant

Nov 2023 - Apr 2024

Worcester Polytechnic Institute | Worcester, MA

- Developed Python scripts to automate departmental tasks, generate reports, and process enrollment data.
- Oversaw course scheduling, tutoring space readiness, and visitor assistance to ensure smooth operations.

Student Researcher

Aug 2023 - Apr 2024

Overthrow Inc. | Worcester, MA

- Conducted user studies and developed a cyclical framework to enhance user retention for Perr, a file-sharing app.
- Transformed insights from user feedback reports into actionable design changes and Figma mockups, resulting in improvement in retention gains and \$181 in marketing savings per a retained user.

Data Analyst Intern

May - Aug 2023

Reading Municipal Light Department | Reading, MA

- Used Pandas to perform data cleaning, transformation, and analysis of customer electricity meter readings.
- Created interactive Power BI dashboards for the Integrated Resources Department, covering key areas of energy usage, electric vehicle impacts, and renewable technology.

Student Software Engineer

Jan - Mar 2023

Worcester Polytechnic Institute | Worcester, MA

- In a ten-person team, applied Agile methodologies to develop a service requests app for Mass General Brigham Hospital, showcasing potential features, UIs, and design approaches for consideration.
- Contributed to the development of the database using PostgreSQL and the backend in Java.

Undergraduate Researcher

Aug - Oct 2022

National Park Service | Coram, MT

- Worked with 3 teammates to assess the effectiveness and limitations of big data tools for Glacier National Park.
- Used an integrated data visualization and analytics software provided by Zartico, a data intelligence company.

Business and Translation Volunteer

Jul - Aug 2019

Cooperative's Union of Kyrgyzstan | Issyk-Kul Region, Kyrgyzstan

- Helped farmers collect data for business plans and translate them for international donor-sponsored programs.
- Assisted with event management and translation at the Cooperative Union's annual conference.
